RapidDeploy

Smart Security, Simply Done

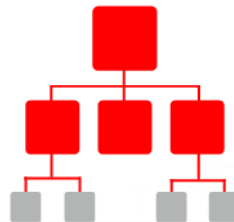

Making Sense of Cyber Security

Everything we do starts with how we are going provide the smartest security in the simplest way.

Intelligent Protection

Effective protection against today's vast number of evolving threats requires multiple services working intelligently together. Prevent, detect, and instantly respond to cyber attacks with automated policies.

Simplified Management

Managing security across your organization has never been simpler. Use out-of-the-box tools to quickly and easily deploy, configure, and maintain your security with the granularity of your choice.

Actionable Visibility

Monitor and report on the health of your IT infrastructure. Actionable visibility tools enable you to proactively identify threats, while providing corrective action against known issues.

Large Customer Base Across Verticals

A large number of SMEs & Distributed Enterprise customers are recognizing WatchGuard's scalable architecture and best-in-class manageability

Simplified Management

WatchGuard System Manager

Centralized and easy to use management of your network security appliances and services.

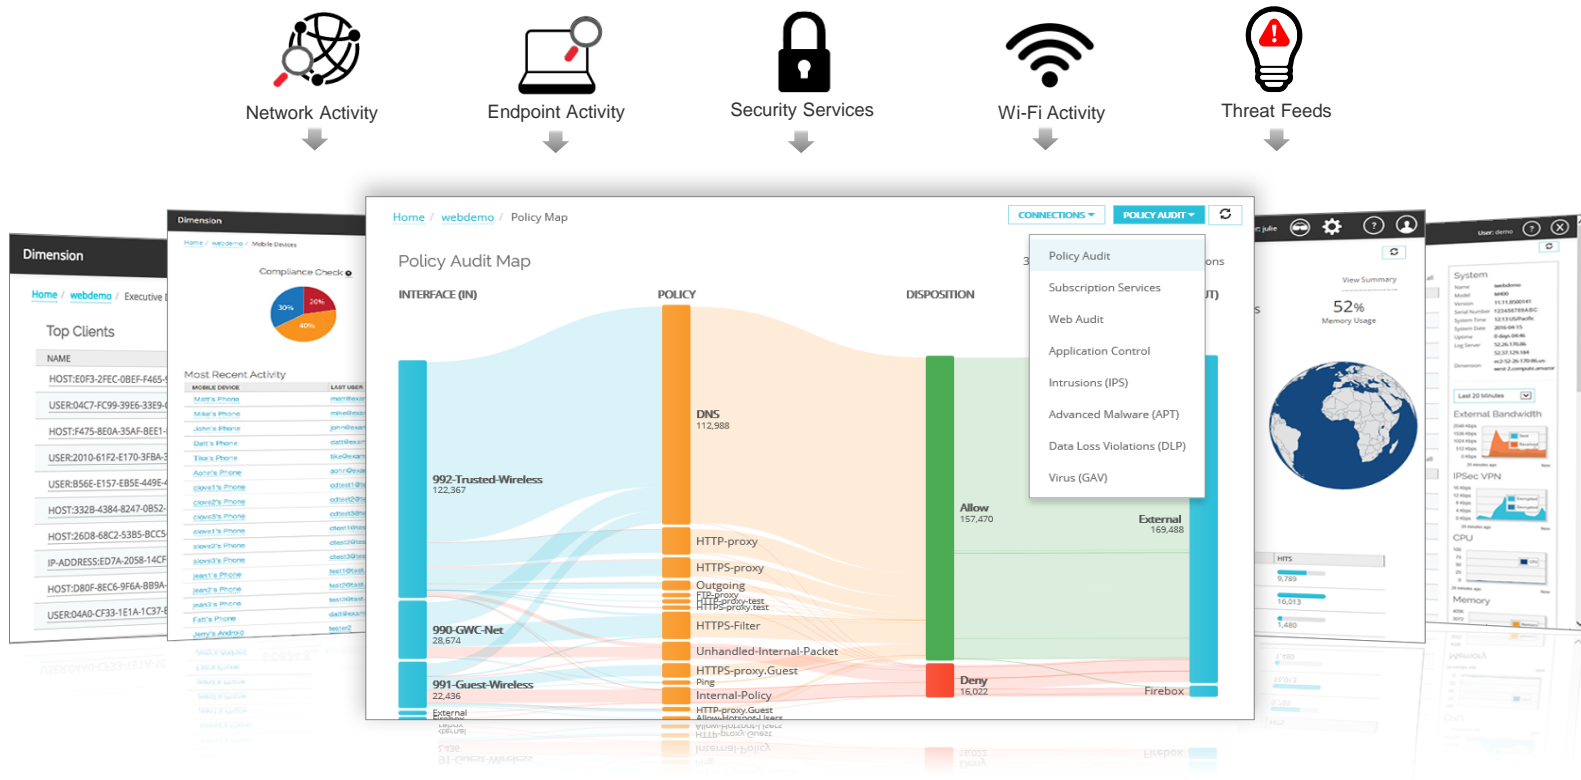

WatchGuard Wi-Fi Cloud

Simple, centralized management with marketing and guest engagement tools for your Wi-Fi environment.

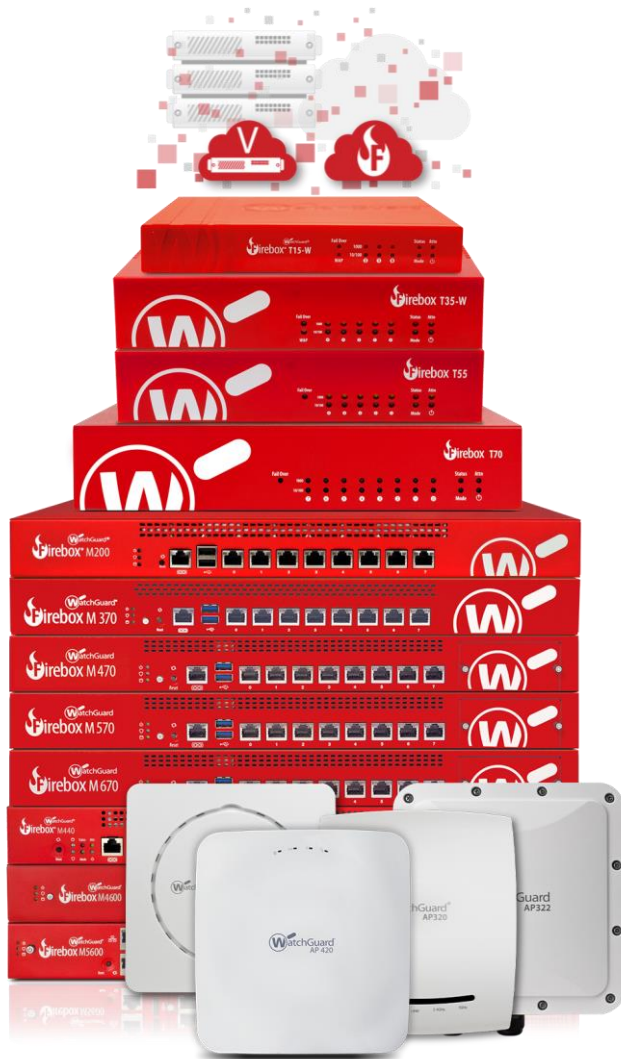

Out-of-the-box tools provide centralized configuration, deployment, and ongoing management that is simple enough for anyone and scalable to please everyone – including everything you need for wired and wireless networks.

Actionable Visibility

Easily identify actionable network and security trends, monitor security service efficacy, and easily generate business, compliance, and network health reports with stunning visualization tools.

One Platform, Total Security

EASIER TO PURCHASE

One platform, one package, total security. Our security platform delivers a suite of powerful network, Wi-Fi, and endpoint security services along with the intelligence of correlation and industry-leading performance.

EASIER TO DEPLOY

Remotely deploy and configure multiple Firebox appliances across a distributed enterprise with minimal on-site assistance using a cloud-based deployment and configuration tool.

EASIER TO MANAGE

Manage one Firebox appliance or hundreds from a single, easy-to-use console, maximizing efficiency and streamlining network administration, while applying configuration changes in real time or as a scheduled task.

WatchGuard Secure Wi-Fi

With WatchGuard Secure Wi-Fi, you not only build your brand – you protect it. Gain the top performance with blazing speeds, engaging guest experiences, and a breadth of analytics about your customers, while protecting your business from cyber criminals.

Protecting Your Wi-Fi

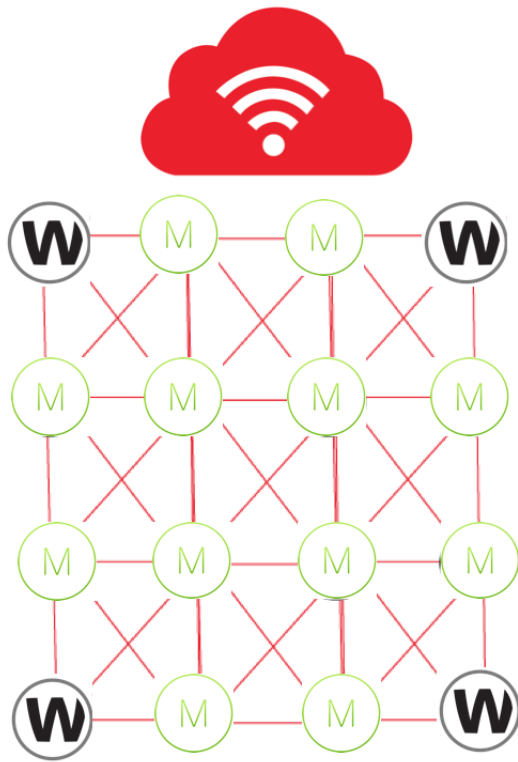

Wireless Intrusion Prevention System (WIPS)

- Access point that scans the air space to look for malicious activity
- When found, the WIPS technology will block this threat
- Acts as a “force field” to protect your business and users

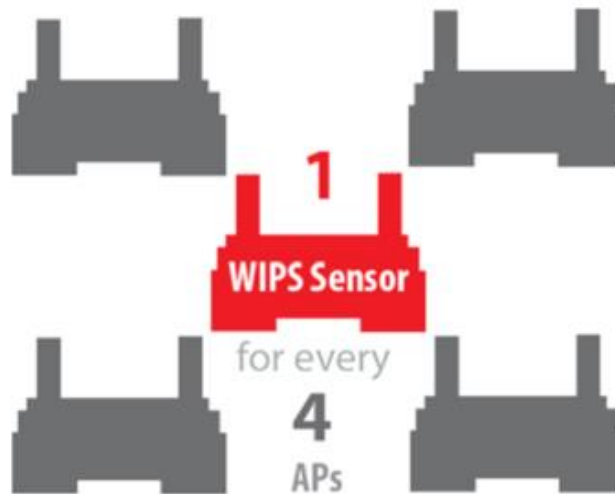

You Don't HAVE to Rip and Replace

Gain added Wi-Fi security without needing to replace your existing access points.

WatchGuard APs as 'dedicated WIPS sensors' installed alongside competitor's APs

Wi-Fi Security + Secure Engagement & Analytics

Leverage the Wi-Fi Cloud for all your needs: security, captive portal engagement, location-based analytics

The WatchGuard Difference

Enterprise-Grade

Best-in-class security services without the cost or complexity

Simplicity

Easy and straightforward to configure, deploy, and centrally manage

Performance

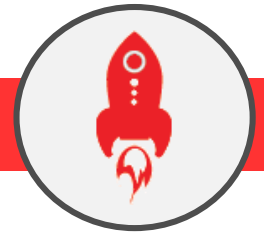

Fastest UTM performance at all price points

Correlation

Correlate all security events across your network and from TI feeds for maximum protection

Future-Proof

The quickest access to new and improved security services
